

PAYING HOMAGE TO THE EXISTING SKATEPARK

EXISTING SKATEPARK OBSTACLES REPLICAS

The Princes Gardens Skatepark is a high profile inner city facility and provides major connections into the skate culture of Melbourne. This has been generated through a high number of end users utilizing this space throughout their years of skateboarding and development, the historic competitions and jams that have been held at the facility and its deep rooted presence in the cultural through well known photo shoots and visitation from high profile skaters.

As such, a key objective for the proposed design is to replicate a number of the much loved features within the existing park with new and reinterpreted obstacles that will enhance the park and create a more contemporary facility.

The following image comparison study demonstrates how Convic have addressed this objective, identifies the existing features within the current facility and what they will be replaced with in the proposed design.

FLAT BANK HIP

QUARTER PIPE
